

product type designation

product description

Connecting cable RS232, Sub-D / PicoBlade

Communication cable (4-core)

SIMATIC RF1000 connecting cable, pre-assembled RS232, between RF1040R or RF1070R and RF120C; black, length 2 m.

Figure similar

suitability for use

plug-in cable for connecting an RF1000 reader to the RF120C communication module

cable designation

LiYCY 4x AWG26

wire length

2 m

electrical data

number of electrical connections

2

type of electrical connection

D-sub (male, 9-pole, 45°) / PicoBlade 51021 5-pole

loop resistance per length / maximum

130 mΩ/m

operating voltage

• maximum

300 V

mechanical data

number of electrical cores

4

design of the shield

Braided shield made of tin-plated copper wires

outer diameter

• of cable sheath

4.6 mm

material

• of the wire insulation

PVC

• of cable sheath

Special PVC, flame resistant according to UL-VW-1

color

• of the insulation of data wires

international color code

• of cable sheath

Black

bending radius

• with single bend / minimum permissible

69 mm

• with multiple bends / minimum permissible

69 mm

weight per length

35 kg/km

ambient conditions

ambient temperature

• during operation

-15 ... +80 °C

• during storage

-30 ... +80 °C

• during transport

-30 ... +80 °C

• during installation

-15 ... +80 °C

fire behavior

flame resistant according to IEC 60332-1-2

chemical resistance

• to mineral oil

resistant

• to water

resistant

radiological resistance / to UV radiation

resistant

product features, product functions, product components / general

product feature	
• halogen-free • silicon-free	No Yes
standards, specifications, approvals	
UL/ETL listing / 300 V Rating	Yes; UL AWM 2464/2517 (only cable without plug)
reference code	
• according to IEC 81346-2 • according to IEC 81346-2:2019	WG WGB

security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
